Summary

System development student proficient in various frameworks and technologies such as Java, Go, React, and .NET. I have a solid foundation in the development lifecycle and maintaining software. I am now eager to begin my journey as a trainee where I can apply my technical skills to real world problems, learn from mentors, and grow into a versatile full-stack developer alongside like-minded colleagues

Experience

IT Project Manager

Nov 2025 - Jun 2026

Stockholm Federation of Student Unions

🌐 <https://akademiskkvart.se>

I'm currently on a mission at SSCO, leading the development of akademiskkvart.se, a platform which provides students in Stockholm with a safe and fair subletting marketplace. I'm responsible for the entire project, managing AWS infrastructure including IAM, S3, Cognito, DynamoDB, and Lambda, overseeing security, reducing hosting costs, and making the platform more manageable for non-technical administrators while ensuring it meets its goals.

Vice Head of Web Development

Sep 2025 - Sep 2026

Systemvetardagen

🌐 <https://systemvetardagen.se>

I currently serve as Vice Head of Web Development for Systemvetardagen, a major tech job fair. I help lead a small team of 10 developers as we build a new backend and update the website for the fair's 30th anniversary. Thus far I have eliminated all hosting expenses of previous systems while also expanding on the operational functionality and overall usefulness of the platforms for both visitors and organizers.

Tutoring Administrator

Nov 2024 - Present

Department of Computer and Systems Sciences

🌐 <https://www.su.se/departament-of-computer-and-systems-sciences/>

As a tutor, I support students with a wide range of topics, helping them strengthen their coding and problem-solving skills. In addition to tutoring, I'm responsible for administrative tasks and recruiting new tutors to the team. During my role i have completed 200+ tutoring sessions with students and worked with teachers and professors to plan tutoring for certain courses.

Assembly Operator

Sep 2022 - Sep 2025

Inmotion Technologies AB

🌐 <https://evs-inmotion.com/en/>

At Inmotion Technologies, I worked as an assembly operator where I learned the importance of ESD safety in maintaining high quality standards. The products I worked on included ACS, APS3, ACH, and DCC2

Education

Computer- and System Sciences

2023-2026

Department of Computer and System Sciences

Bachelor's
